Tax reforms announced by the government are going to be an extra burden to many SMEs.

Tax changes on the horizon are damaging to businesses that form the backbone of many Canadian communities.

Statistics show that anywhere between 85-90 per cent of businesses in Canada are small and medium-sized and, according to July 2017 Statistics Canada data, nearly 50% (1,297,000) of (2,825,300) self-employed Canadians head businesses that are incorporated (either with or without paid help). Incorporated companies are not only large – they are small too!

Businesses need to be aware that tax changes announced by the federal government will be harmful. Get involved. Write your Member of Parliament; we've got the tools.

Tell your story. Your MP needs to know how the proposed tax changes – the greatest in 50 years - will affect your business – the business that you've poured your ♥ and soul into. Find your MP here: <http://bit.ly/2gdOHWZ>

An attack on small business is an attack on the middle class.
